## Beware of Break-ins and Protect Yourself

Recently, there have been an increasing number of break-ins occurring.

A break-in occurs when someone is trespassing on someone else's property, stealing valuables and other items.

Burglars target houses and apartments with unlocked windows and doors.

During the warm weather, you may be tempted to keep your windows open but unfortunately this can make you a target for those with ill-intentions. Please try to use your air conditioner or a fan when you sleep and avoid leaving the windows open!

### Steps to prevent trespassing

- Always lock the windows and doors when you go to sleep.
- Don't leave anything around your house that a thief could use to get inside.
- Put a second lock on your window or install security film if at all possible.
