## Security measures are also in place during the summer!

During the hot summer, you may open your windows and front doors more often.

If you forget to close your windows and front door, you may become more susceptible to burglary and other crimes.

Children, women, and seniors are especially vulnerable to crime.

It is important that we protect ourselves and that people living nearby look out for each other.

Please be cautious and take measures in your home to prevent crime in the summer.

**Always lock your windows and front door  
when you go out or go to bed.**

• Beware of burglars entering your home!

• Beware of people peeping into your house and taking pictures!
