

### 3. Numazu Commercial High School

## Regional Revitalization of the Izu Peninsula Geopark

### Regional revitalization project created through tourism business

At our school, Numazu Commercial High School, students actively engage in activities aimed at raising awareness of the Izu Peninsula Geopark and revitalizing the local community, taking the initiative to explore what they can do in collaboration with the region. This year, they conducted research activities under the theme of 'Regional Revitalization Projects Created through Tourism Business.'

More specifically, they organized activities to raise awareness of the geopark at children's events, planned and led trial tours of geospots, and collaborated with Izu Hakone Railway to place promotional stickers on the windows of operating trains, showcasing the attractions of the geopark.

They also created posters in English, hoping that people from other countries would also be able to experience the charms of the Izu Peninsula Geopark that they have learned about.
